INDIGO NOLAN

07775 156078 | cv@indigonolan.com | indigonolan.com | github.com/Lem0naise | linkedin.com/in/indigonolan
London / Southampton

Education

University of Southampton — Southampton, UK
MEng Computer Science | Predicted First — *Expected 2028*

- **Academics:** A*A*A at A-Level, 11 A*s at GCSE.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS
Frameworks: Next.js, React, React Native, Node.js, GDScript
DevOps & Tools: Docker, Git, Vercel, Supabase, PostgreSQL, MongoDB, Linux/Bash, Google Cloud Platform (GCP)
Spoken Languages: English (Native), French (B2), Russian (B2), German (B1)

Experience

University of Southampton — Jan 2026
Research Assistant — *Southampton, UK*

- Collected data mapping nighttime urban environments, integrating quantitative sensor data with qualitative metrics.
- Used hardware (luxmeters, GPS, spectrometers) to capture spatial light/color data, correlating it with user experience.

Southampton University Students' Union — June 2025 – Present
School President (Electronics & Computer Science) — *Southampton, UK*

- Elected representative for 2,800 students; chaired the committee and liaised directly with senior faculty for curriculum improvements.
- Architected structural changes to the voting system, successfully fixing past under-representation issues.

Shell AI — July 2023
Summer Intern — *London, UK*

- Analyzed machine learning models for optimizing real-time oil drilling operations to improve efficiency and safety.
- Co-designed and prototyped a social justice mobile application, pitching the UI/UX architecture to senior Experience Design leads.

Projects

CashCat | *Next.js, React, PostgreSQL, REST* — cashcat.app

- Full-stack financial application implementing zero-based budgeting principles with complex state management.

Climate Stories Library | *Next.js, Supabase, Vercel, Google Cloud Platform & APIs* — climatestorieslibrary.com

- Designed a professional website and video backend for a climate organisation, increasing monthly engagement by 1300% and connecting them with 40+ international clients.

The Political Playground | *React, Custom Simulation Engine* — polplay.indigo.spot

- Developed a complex election simulation engine featuring coalition mathematics and dynamic voter bloc logic.
- Designed an interactive UI similar to "The Campaign Trail" to gamify democratic education.

Head and Heart | *React, Convex, RESTful APIs* — headandheart.app

- Created a private media manager to track your favourite films, shows, books, board games, as a privacy and local-focused alternative to Letterboxd.

Fantasteroids | *Godot, Steamworks API, GDScript* — Fantasteroids on Steam

- Managed the full development lifecycle of a retro-arcade game, achieving a successful Steam marketplace launch with 300+ players and 90% positive ratings.

ESA AstroPi Challenge | *Python, OpenCV, NumPy*

- Wrote an image-processing algorithm deployed on the International Space Station to calculate cloud/land cover from orbit, processing 200+ images daily with high efficiency.
